

TEC 45

Now you are diving into depths beyond recreational limits

You will now have done some extended decompression dives now it is time to learn more about accelerated decompression. During this course you will be learning to calculate your dive plans both by hand and using multigas dive computers, you will also practice accelerated decompression dives.

Who can do the programme?

To start the course you will need to be:

- Tec 40 or equivalent
- Enriched Air Diver and Deep Diver
- Be at least 18 years of age

What's involved?

- Knowledge development
- 3 practical application session
- 1 confined (or limited) open water dive
- 2 open water simulated decompression dives
- 1 open water decompression dive

By the end of this course you will be qualified to:

- Make single and repetitive dives to a maximum depth of 45 metres.
- Use a single decompression gas of EANx or Oxygen to accelerate or add conservatism to the decompression

You are now on your way to becoming a Tec Diver. Your next course – Tec 50 will take you deeper as well as expanding your problem solving techniques.

Stretch your boundaries.....
